DETAILED ACTION

Receipt is acknowledged of amendment filed on August 10, 2005. Claims 1-3, 5, and 6 are pending. Claim rejections made under 35 U.S.C. § 102 as indicated in the previous Office action dated April 7, 2005 are withdrawn and modified to address the amended claim limitation. New rejections are made.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Tokuyama et al. (EP 1090630 A1) ("Tokuyama ").

Tokuyama discloses method of treating atopic dermatitis such as erythema by topically applying a composition comprising ethanolamine in cosmetically acceptable carriers. See abstract; par. 0234-0259; instant claim 1. See par. 0006 which meets the formula and the constituents of instant claim 1. Par. 0011 discloses 2-ethylaminoethanol, diethanolamine, diethanolamine, and 2-dimethylaminoethanol, and specific formulations comprising 1 % by weight of the ethanolamines are disclosed in Examples 13-16, among others. See par. 120-124; instant claims 1-3. The compositions also comprise paraben and ethanol, potentially skin-irritating materials. See instant claim 6. See par. 2. See Berndt (US 5626856), col. 1, lines 55 – 64. The claimed method of "ameliorating the irritating effects of a skin irritating composition" is inherently practiced by making the Tokuyama composition by adding paraben with dimethylethanolamine as disclosed by the reference.

The prior art method of treating atopic dermatitis such as erythema meets instant claim of method of treating the inflamed skin due to allergic skin reactions, as erythema can be caused by allergic skin reaction. See applicants' spec. p. 7, lines 18 – 28.

Claims 1-3, 5, 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Perricone (US 6365623 B1) ('623).

'623 patent teaches method of treating acne in inflammation phase by applying a composition comprising lipoic acid and most preferably adjunct ingredients such as 0.5 – 5 % by weight of methyl or ethyl-aminoalcohols or 0.05-% by weight of tyrosine. See col. 1, line 21 – col. 2, line 6; col. 5, 30-53; col. 8, lines 41-61; col. 9, lines 16-22; instant claims 1 and 5. The patent specifically states, "one particularly efficacious embodiment of the invention contains lipoic acid, glycolic or lactic acid, and dimethylaminoalcohol; and another further contains tyrosine." See col. 9, lines 21-23. The reference teaches that Examiner asserts that the claimed method is anticipated by the specific teaching here. As for claim 6, the reference teaches to incorporate benzyl peroxide, retinoids, alpha-hydroxy acids such as glycolic acids, which potentially irritate the skin. See Ren (US 6183747 B1), col. 2, lines 2 –18; Ptchelintsev et al. (US 6333356 B1), col. 1, lines 40-49.

The prior art method of reducing erythema meets instant claim of method of treating the inflamed skin due to allergic skin reactions, as erythema can be caused by allergic skin reaction. See Perricone, abstract; applicants' spec. p. 7, lines 18 – 28.

Response to Arguments

Applicant's arguments with respect to claims 1-3, 5, and 6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
